

## PORTABLE PICKLEBALL SYSTEM

Portable Pickleball system for Indoor/  
Outdoor play, when in-ground  
installation is not available or desired.

Heavy duty non-scuff wheels allow  
for ease of movement and the wheels  
can be stored easily when in play.

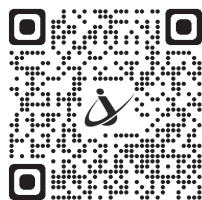

USAP compliant. 22' L x 36" H (when fully  
extended). Durable black powder coated finish  
resists rust and increases durability. The frame is  
constructed of heavy-duty 7 and 11-gauge steel.  
Provides proper tension on the net, no sagging,  
when fully extended.

### ***RALLY*** **PICKLEBALL RPP-3PORT**

#### **Features:**

- Portable net system ideal for Pickleball play
- Collapsible frame reduces storage requirements. The frame can be collapsed to 13½' or 7' long
- 3-inch removable, round powder coated uprights with an internal self-locking winch
- Wheel assembly can be flipped up or removed during play with a quick release pin lock
- 2-foot cross members ("feet") stabilize the net system when it is on the ground, these can be removed for storage
- 2.5 mm twisted weather resistant polyethylene net with 4mm vinyl coated steel top cable, 2½" white woven polyester headband and ½" fiberglass dowel rods (PT-21N)
